Work experience

March 2017 — Present
UX/UI Designer // Education Perfect (Dunedin)

A SaaS e-learning platform used by 600,000 students internationally. I optimise teacher and student experiences with a focus on usability and engagement for web and mobile. I work closely with stakeholders, developers and marketers, ideate, wireframe, create interactive prototypes, facilitate in-school user testing, analyse its results and create Hi-fi designs.

Aug 2017 — Dec 2017
UX Designer + Researcher // Cloudy Apple

A passion project for social good which turned into a digital creative studio. My role comprised of market research, finding and establishing communication with customers, namely through social media channels. The undertaken projects went through a rigorous UX/UI design process with frequent client check-ins to ensure the outcomes we deliver align with their strategic needs and objectives.

Nov 2016 — Feb 2017
UX Designer Intern // Pushpay

A fast-growing SaaS company engaging with faith, education, and nonprofit sectors internationally. I've closely collaborated with developers, product analysts, and UX/UI designers on projects that set a foundation for onboarding experiences for recent employees. I've conducted remote stakeholder and user interviews, created wireframes and interactive prototypes, vector assets, graphs, and animations.

Feb 2016 — Dec 2017
Student Ambassador // AUT University

When studying at AUT, I became a university student representative tasked with assisting new students and visitors, training new ambassadors. It required explicit knowledge of AUT's layout and services, and exceptional communication and team building skills.

Education

2015 — 2017
AUT University
Bachelor of Creative Technologies (BCT)

2014
ACG Norton College
Foundation degree. Top Student award.
